OBSERVATIONS

Income exceeds the threshold for the 3.8% Net Investment Income Tax (NIIT). Consider strategies to reduce taxable income and be mindful of realized capital gains.

You were charged an underpayment penalty. You can avoid this penalty by paying at least the "safe harbor" amount based on your previous year's tax return through withholding or estimated tax payments. Consider discussing penalty proofing with a tax professional.

The Qualified Business Income (QBI) deduction phases out between \$340,100 and \$440,100 for certain professions named by the IRS. Your taxable income was within that phaseout range. If your business falls within one of those named professions, your QBI eligibility might be impacted.

The 2023 safe harbor for underpayment penalties is your total tax x 110%, or \$102,928. Note that the timing of your payments is also important with respect to avoiding penalties. Withholding from a paycheck or retirement account distributions are considered to have happened throughout the year, but estimated tax payments should be timed to correspond with the timing of the income earned. A tax professional should be able to help in cases where income is uneven throughout the year.

Your Modified Adjusted Gross Income (MAGI) suggests you are not eligible to contribute directly to a Roth IRA. You do have eligible compensation though, so you might discuss the feasibility of the "Backdoor Roth" strategy.

Your tax return suggests you may have business income. Depending on your circumstances, you may be able to implement a retirement plan for the business to defer taxes.

You deducted mortgage interest on your tax return. Given the high standard deduction, itemized deductions on mortgage interest are less valuable than they once were.

You had charitable contributions in excess of \$10,000. If you plan to do donations of similar size in future years, you may consider grouping them into alternating tax years to maximize your deductions. A "Donor Advised Fund" can facilitate this strategy.

You owed additional taxes beyond any withholding or estimated tax payments. If this was due to a one-time event, you may not need to take any action. If not, consider adjusting your withholding to avoid any surprise lump sum payments due at tax time.

A portion of your retirement or annuity distributions was not taxable. This suggests some after-tax basis in the account, a rollover, or a Qualified Charitable Distribution.

Schedule C does not include any expenses on line 9, car and truck expenses. Do you use a vehicle for any business-related activities?

Review employer-provided benefits to ensure you are taking full advantage of any pre-tax options.

Keep track of your home improvement expenses for determining your adjusted cost basis in the event of a home sale.
