

## WisdomTree U.S. Quality Growth Fund – QGRW (NYSE Arca)

### Summary Prospectus – August 1, 2023

Before you invest in the Fund, as defined below, you may want to review the Fund’s prospectus and statement of additional information (“SAI”), which contain more information about the Fund and the risks of investing in the Fund. The Fund’s current prospectus and SAI are incorporated by reference into this summary prospectus. You can find the Fund’s prospectus and SAI, reports to shareholders, as well as other information about the Fund, online at [www.wisdomtree.com/investments/resource-library/prospectus-regulatory-reports](http://www.wisdomtree.com/investments/resource-library/prospectus-regulatory-reports). You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to [getinfo@wisdomtree.com](mailto:getinfo@wisdomtree.com).

#### Investment Objective

The WisdomTree U.S. Quality Growth Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Quality Growth Index (the “Index”).

#### Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.28%

#### Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of their shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years
	\$ 29	\$ 90

#### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal period, the Fund’s portfolio turnover rate was 1% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole.

The Index is a modified market-capitalization weighted index that is comprised of 100 U.S. large-capitalization and mid-capitalization companies with the highest composite scores based on two fundamental factors: growth and quality, which are equally weighted. The growth factor is determined by a company’s ranking based on a 50% weight in its earnings growth forecast, a 25% weight in its trailing five-year EBITDA (*i.e.*, earnings before interest, taxes, depreciation and amortization) growth, and a 25% weight in its trailing five-year sales growth. The quality factor is determined by a company’s ranking based on a 50% weight to each of its trailing three-year average return on equity and trailing three-year return on assets. The Index constituents are determined by an Index committee that looks at companies focusing on the above-referenced factors.

The Index is reconstituted and rebalanced semi-annually. To be eligible for inclusion in the Index, a company must meet the following criteria as of the Index screening date: (i) list shares on a U.S. stock exchange, (ii) be incorporated and headquartered in the United States, and (iii) have a median daily dollar trading volume of at least \$1 million for each of the preceding three months. At the time of each semi-annual reconstitution and rebalance, the weight of any individual security is capped at 15%.

WisdomTree, Inc. (“WisdomTree”), as Index provider, currently uses the Global Industry Classification Standard (GICS®), a widely recognized industry classification methodology developed by MSCI, Inc. and Standard & Poor’s Financial Services LLC, to define companies within a given sector. The following sectors are included in the Index: communication services, consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in the energy equipment and services industry as well as the oil, gas and consumable fuels industry. As of June 30, 2023, companies in the information technology and consumer discretionary sectors comprised a significant portion (*i.e.*, in excess of 15% of the Index’s total weighting) of the Index; however, the Index’s sector exposure may change from time to time.

To the extent the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

## Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. While certain of the risks are prioritized in terms of their relevance to the Fund’s investment strategies, most risks are presented in alphabetical order. This ordering approach is designed to both facilitate an investor’s understanding of the Fund’s risks and enable an investor to easily locate and compare risks among funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

- **Growth Investing Risk.** Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on the future expectations of the economy and the stock’s issuing company.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The market prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV, and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in

times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

- **Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile and retail companies, as well as hotels, restaurants and other leisure facilities. This sector can be significantly affected by, among other things, changes in domestic and international economies, exchange and interest rates, economic growth, worldwide demand, supply chain constraints, social trends, consumers' disposable income levels, and propensity to spend.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index may not perform as intended. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, companies that offer software and information technology services, manufacturers and distributors of technology hardware and equipment such as communications equipment, cellular phones, computers and peripherals, electronic equipment and related instruments, and semiconductors and related equipment and materials. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform

securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

- **Mid-Capitalization Investing Risk.** The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies, but mid-capitalization companies may also underperform the securities of small-capitalization companies because medium capitalization companies are more mature and are subject to slower growth during economic expansion.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and that of its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs, while also managing cash flows and potential operational inefficiencies, not incurred by its Index. In addition, when markets are volatile, the ability to sell securities at fair market prices may be adversely affected and may result in additional trading costs and/or increase the non-correlation risk. The Fund's use of sampling techniques also may affect its ability to achieve close correlation with its Index.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

### **Fund Performance**

The Fund commenced operations on December 15, 2022, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com/investments](http://www.wisdomtree.com/investments).

### **Management**

#### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser") serves as investment adviser to the Fund. Mellon Investments Corporation (the "Sub-Adviser") serves as sub-adviser to the Fund.

#### **Portfolio Managers**

The Fund is managed by the Sub-Adviser's Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are identified below.

Marlene Walker-Smith, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2022.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since its inception in December 2022.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since its inception in December 2022.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since its inception in December 2022.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since its inception in December 2022.

#### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market

prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com/investments](http://www.wisdomtree.com/investments).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
